 Engineered System (provide a design with a copy of the Colorado State Engineer's stamp)
 Pit Privy
 Greywater System
 Other (explain) _____

Residential ISDS Application

The following is needed for the submittal of all ISDS applications:

- Two site plans
- A copy of the recorded warranty deed is required for proof of ownership. This may be obtained from the Gunnison County Clerk and Recorders office.
- A Driveway Access permit
- Copy of well permit, if applicable
- Copy of proof of water tap, if applicable
- Site Inspection. You will need to schedule a time when the Town's building inspector can meet with you onsite. It is a good idea for you to be present at the site inspection.
- Perc Test. You will need to coordinate the perc test. Soil percolation tests require that you dig 3 holes, 36 inches deep and 4 to 12 inches in diameter in the last 18 inches of each hole. The holes need to be spaced 6 to 8 feet apart in the general center of the proposed absorption area. Fill the holes with 18 inches water 8 to 24 hours before the scheduled perc test. You will need to have three 5-gallon buckets of water for the perc test. The profile hole is one hole in the general center of the absorption area 8 feet deep. Stop digging if you hit ground water or bedrock before 8 feet. The hole will need to be at least 8 feet from the perc holes.
- Application fee of \$50
- Permit fee of \$140
- Final Site Inspection. The final inspection is required after the system has been placed in the grounds and the elements connected, but **before** it has been backfilled. Please give 72 hours notice.

In signing this application and upon receiving Town of Marble authorization and permission to install the ISDS described herein, the Applicant signifies that he/she has read, understands, and accepts the provisions and conditions and agrees to install the ISDS in accordance with the accompanying specifications plan reviewed and signed by the Town of Marble Board of Trustees.

I acknowledge that I have received a copy of the Town of Marble Individual Sewage Disposal System (ISDS) regulations.
